

Recovery Bowl — 17:50

Casein anchor | yogurt-berry base | phantom sweetness

① Base Bowl

Ingredient	Amount	Role
Full-fat Greek yogurt	200g (~¾ cup)	Casein anchor + calcium shield (~200mg Ca)
Blueberries	¾ cup	Anthocyanin + polyphenol pulse
Casein protein (or pea + rice protein)	1 scoop	Slow-release MPS overnight — pea/rice combo is full vegan equivalent
Black bean liquid	2 tbsp (frozen cube) optional	Cyanidin-3-glucoside boost — the purple cooking liquid from batch
Black garlic	2–3 cloves, sliced	SAC — sustained cardiovascular protection

② Phantom Sweetness Stack

Spice	Amount	Why
Ceylon Cinnamon	pinch (~■ tsp)	Glycemic anchor · olfactory sweetness signal
Cardamom (ground)	pinch	Parasympathetic calm · neuro-modulator
Nutmeg (fresh-grated preferred)	pinch	Warming aromatic depth
Pure Madagascar Vanilla Extract	¼ tsp CACAO DAYS ONLY	Anti-mutagenic vanillin · phantom sweetness Paired with cacao — NOT a daily baseline

Olfactory sweetness trick: these compounds signal sweetness to the brain via aroma without triggering an insulin response. No sugar, no stevia, no artificial sweeteners.

③ Cacao Rule — 2–3× per week MAX, never daily

Rule	Detail
Amount	½–1 tsp raw cacao nibs stirred into bowl
Calcium shield	Greek yogurt MUST be in the bowl — ~200mg Ca binds cacao oxalates in the gut before kidneys
Vanilla pairing	Vanilla Extract goes in ON CACAO DAYS — not daily (prevents receptor downregulation)
Chocolate whey day	Skip raw cacao nibs — chocolate whey already counts as one cacao exposure

Recovery Bowl (continued)

Day-type rules · savory chaas variant · conflict rules

④ Day-Type Rules

Day Type	Casein	Notes
Training day	1 scoop	Full bowl — casein + berries + phantom sweetness
Rest / Cardio day	SKIP casein scoop	Yogurt + berries + cinnamon + cardamom + nutmeg only
Missed 17:30 window	+ 1 scoop Unflavored Whey	Add unflavored whey on top of casein if post-workout window was missed

⑤ Savory Chaas Variant (hot weather / digestive rest)

Replaces the sweet bowl entirely. Blend all together until smooth:

Ingredient	Amount
Greek yogurt	100g
Cold water	½ cup
Roasted cumin powder	¼ tsp
Black salt (kala namak)	pinch
Unflavored protein	1 scoop
MUST NOT be spicy	No chili · no hing · no pepper — no exceptions

Chaas is gut-safe on hard days. The tangy + cumin profile satisfies the recovery-signal without heaviness. Unflavored protein keeps it savory — flavored whey wrecks the profile.

⑥ Black Garlic — Why It's Here

	Black Garlic (SAC)	Raw Rested Garlic (Allicin)
Compound	S-allyl cysteine (SAC)	Allicin — formed after 10-min rest
Heat stable	Yes — survives cooking, survives the bowl	No — degrades above 60°C / 140°F
Mechanism	H ₂ S donor · antioxidant · long half-life cardiovascular protection	Acute H ₂ S generation · anti-platelet · immediate signal
Source	Fermented 3–4 weeks at 140–170°F in rice cooker (set to Keep Warm)	Frozen rested-garlic cubes — day-of only
Protocol use	Slice 2–3 cloves directly into yogurt bowl OR mince into chaas	Day-of fat bloom with beans

These are different compounds with different mechanisms — no redundancy. Run both: black garlic in the bowl (daily), rested garlic cubes in the beans (day-of).
