

Recovery Bowl — 17:50

Casein anchor · yogurt-berry base · phantom sweetness

① Base Bowl

Ingredient	Amount	Role
Full-fat Greek yogurt	200g (~¾ cup)	Casein anchor + calcium shield (~200mg Ca)
Blueberries	¾ cup	Anthocyanin + polyphenol pulse
Casein protein (or pea + rice protein)	1 scoop	Slow-release MPS overnight — pea/rice combo is full vegan equivalent
Black bean liquid	2 tbsp (frozen cube) optional	Cyanidin-3-glucoside boost — the purple cooking liquid from batch
Black garlic	2–3 cloves, sliced	SAC — sustained cardiovascular protection

② Phantom Sweetness Stack

Spice	Amount	Why
Ceylon Cinnamon	pinch (~■ tsp)	Glycemic anchor · olfactory sweetness signal
Cardamom (ground)	pinch	Parasympathetic calm · neuro-modulator
Nutmeg (fresh-grated preferred)	pinch	Warming aromatic depth
Pure Madagascar Vanilla Extract	¼ tsp CACAO DAYS ONLY	Anti-mutagenic vanillin · phantom sweetness Paired with cacao — NOT a daily baseline

Olfactory sweetness trick: these compounds signal sweetness to the brain via aroma without triggering an insulin response. No sugar, no stevia, no artificial sweeteners.

③ Cacao Rule — 2–3× per week MAX, never daily

Rule	Detail
Amount	½–1 tsp raw cacao nibs stirred into bowl
Calcium shield	Greek yogurt MUST be in the bowl — ~200mg Ca binds cacao oxalates in the gut before kidneys
Vanilla pairing	Vanilla Extract goes in ON CACAO DAYS — not daily (prevents receptor downregulation)
Chocolate whey day	Skip raw cacao nibs — chocolate whey already counts as one cacao exposure

Aambali companion · day-type rules · chaas variant · black garlic

Recovery Bowl (continued)

④ Aambali — The Probiotic Companion (17:50)

	Action
What it is	Fermented ragi (finger millet) drink — RS3 + live LAB probiotics. Drunk alongside the bowl at 17:50.
07:00 prep	Scoop ½ cup chilled ragi paste into a jar. Whisk with ¼ cup live yogurt + splash water → buttermilk consistency. Leave covered 10–12h.
Sunday batch cook	Whisk 1 cup ragi flour into 3–4 cups cold water → cook to thick paste → refrigerate (lasts 5 days). Scoop daily at 07:00.
Finish at 17:50	Stir in: ½ tsp cumin powder + pinch black salt + 25g pea/rice protein. Froth. Add 5–10 fresh peppermint leaves muddled.
No-heat rule	NO chili · ginger · habanero — this window is core-temp drop for sleep. Not spicy.
Starch split rule	If taking Aambali → reduce 12:00 quinoa/starch by 50%. Aambali IS your evening starch anchor — don't double it.

⑤ Day-Type Rules

Day Type	Casein	Notes
Training day	1 scoop	Full bowl — casein + berries + phantom sweetness
Rest / Cardio day	SKIP casein	Yogurt + berries + cinnamon + cardamom + nutmeg only
Missed 17:30	+ 1 scoop Unflavored Whey	Add on top of casein if post-workout window missed

⑥ Savory Chaas (replaces bowl — hot weather / digestive rest)

Ingredient	Amount	
Greek yogurt	100g	
Cold water	½ cup	
Roasted cumin powder	¼ tsp	
Black salt (kala namak)	pinch	
Unflavored protein	1 scoop	
MUST NOT be spicy	No chili · no hing · no pepper	

⑦ **Black Garlic vs Raw Allicin — Different Compounds, Both Running**

	Black Garlic (bowl)	Rested Raw Garlic (beans)
Compound	SAC — heat-stable, long half-life	Allicin — rest 10 min after crush
Mechanism	Sustained H■S · antioxidant · cardiovascular	Acute anti-platelet · immediate H■S
Use	2–3 cloves sliced into yogurt (or chaas)	Day-of fat bloom — never freeze before rest
